The 5 Love Languages: The Secret to Love That Lasts By Gary Chapman

We all receive love differently. How we receive love may not be how our partner receives love, which can cause miscommunications. There are five different love languages: words of affirmation, actions, gifts, quality time, and physical touch. This book goes over each love language and even has a quiz, so you can find out your and your partner's love language. While all are important, everyone has that one primary love language. It's a book you'll wish you had read sooner.
